

*Servicing the Electroplating & Surface Finishing Industry*

**Advanced Research Solutions** was formed to help electroplating and surface finishing companies maintain a competitive edge in their markets.

*We facilitate this in the following traditional and non-traditional ways:*

**By developing formulated products** to allow you to internally source your chemistries for a more cost effective option over traditional proprietary sourcing channels.

**By our consulting approach** that focuses our core competencies specific to your processes.

**By delivering** everything needed to assess, formulate and qualify raw material specifications.

**By providing** regulatory and technical documents, training your personnel and connecting you with qualified blending partners that will manufacture to your specifications.

**By helping you take control** of your process thru ownership of the product and knowledge of how and why the product works.

**By our continued partnership**, offering new technology, support your continuous improvement efforts and keeping your processes optimized whenever new product launches occur.

### **Core Competencies**

- ▲ Metal cleaning & problem solving
- ▲ Risk reduction thru ownership & technical know-how transfer
- ▲ Delivering process consistency
- ▲ Buffing compound removal
- ▲ Difficult to clean soils
- ▲ Easing demands in water usage & wastewater treatment

### **Finished Product Categories**

- ▲ Cleaners – soak, spray, electro, ultrasonic, & ultrafiltration
- ▲ Activation – acid salts, inhibitors, surfactants, scale removers, & accelerators
- ▲ Post Treatment – synthetic & petroleum based corrosion inhibitors to ASTM specifications
- ▲ Specialty products for surface finishing, mass finishing & metal working

### **Advanced Research Solutions Commitment**

- ▲ Technical expertise & support
- ▲ Provide value & cost savings
- ▲ Consistency
- ▲ Confidentiality
- ▲ Building a solid foundation every step of the way
